#EUROPEANORGANICMODERN: NEW HOME TOUR, MASTER BEDROOM REVEAL

Hey guys! Switching gears a little today and showing you a look at our master bedroom. For this space I wanted to focus on simple & serene. I kept the color palette neutral with warm woods like in this gorgeous bed from [Thomasville Furniture Utah](#). Did you know they carry around 40 different brands of furniture?! I love that everything you'll find in their huge showroom is from high quality vendors and there is a wide range of styles. My nightstands are also from [Thomasville!](#) They are classic and timeless, plus offer lots of storage!

One of my favorite features of this room is this amazing [fireplace](#)! How cool is it that you can order this [fireplace surround](#) online?! They offer color samples too so you can see how it will look in your space. This [fireplace](#) makes the room feel so fancy and brings that European flair I've mixed in throughout this home.

I also adore this gorgeous & affordable [rug](#) that I used to give some subtle interest. And how about that [chandelier](#)?! Such a showstopper. I'm loving these [lamps](#) too- they have that organic feel to them and the simplicity they provide is just what I was after. I wanted to bring in some neutral texture and this gorgeous [bedding](#) from [Schoolhouse](#) did exactly that! You've got to check out their new collection- it's sooo good! Don't they just have the most fun products?! Love that site. Anyway, I guess I'll let the photos do the talking. You can find product links at the bottom of the post as usual, or on my instagram stories/highlights!
